Reviewer B:

Title

Title reflects the essence of the content of the article (content, method, novelty)

:

The study of Gayo, is never separated from the general study of Aceh in general. The most influential studies are Hurgronje and Bowen in the context of sociology and legal anthropology, later there is Al Yasa' which discusses Inheritance. This study also refers a lot to the two figures above combined with ethnographies and field interviews that support the data and analysis. Therefore, this discussion is quite good and in accordance with the focus of the Samarah journal, especially the discussion on marriage and Islamic

family law.

Abstract

Abstract contains problem of research, method, and result

:

state the research method used as described at the end of the introduction.

Originality

The originality of the subject matter, and the manuscript would be of interest to the the scholar of Islamic countries in general and specifically in Indonesia

:

This manuscript contains authenticity, because it does not only use normative legal materials, but comes from field studies based on interviews with traditional leaders, religious leaders and a number of figures in Gayo. This discussion will be quite interesting for those who are interested in Islamic family law related to customary law.

The Depth of Literature

Whether the article draws on an appropriate range and depth of literature (if not please indicate which sources of literature should be included by the author in future)

:

it's good enough, but it could still be added especially some of John Bowen's books and articles on Gayo.

Finding Presentation

Whether the findings presented are subjected to suitable analysis and sound conclusions drawn

:

The analysis and discussion as well as the conclusions in this manuscript are quite good.

Implications for understanding the study of Islamic family law and Islamic law in Islamic in Islamic countries in general and specifically in Indonesia

:

This manuscript will have broad implications and the study of Islamic family law and marriage studies related to social and customary changes that exist in Gayo. This discussion will obviously attract not only legal scholars, but intellectuals in the Islamic world and Indonesia.

Technical writing

Articles must be in accordance with the surrounding style and journal template

:

1.the research methods section needs to be shortened. then the subtitle "research methods" does not need to be raised, this section includes an introduction.

2.in one section, should make a subtitle (page 22), which is associated with social changes related to marriage traditions in gayo.

3.Conclusions can be shortened and put together paragraphs.

Additional comment for the author:

This article is quite good in terms of substance and focus in accordance with the Samarah journal, because it can be considered for publication with several revisions. for example, the number of pages is relatively large, and should be shortened in several parts.
