Manuscript ID: GJESM-2111-3884

Manuscript Title: **Classification of soil properties based on a joint analysis of shear wave velocity structure and seismic amplification**

Authors: Umar Muksin, Yusran Asnawi, Andrian V H Simanjuntak, Makoto Okubo, Syamsul Rizal, Muhammad Syukri, Suci Izzia Putri

Dear **Mr. Yusran Asnawi**

I wish to acknowledge receiving the above-mentioned manuscript by the manuscript corresponding author. It should be noted that the manuscript will be reviewed for possible publication in the Global Journal of Environmental Science and Management (GJESM). The regular review process includes the following items:

- 1- Checking the manuscript English language
- 2- Format/ Style check based on the GJESM Paper Template
- 3- Plagiarism check (less than 15% duplicates)
- 4- Reaching at the double blind peer reviews the manuscript at least by two potential reviewers in the field of the study, if it passes the three above-mentioned items.

Please be sure that the submitted manuscript has not been published or submitted elsewhere prior to GJESM decision.

The editor's decision will be brought to you for your attention and doing any possible further action in completing the review process, once the paper has been reviewed due to the reviewers' considerations.

GJESM Journal is mainly indexed in Web of Science and Scopus, trying to end your submitted manuscript peer reviews within a month or less for the possible ultimate publication. Thus, an initial editorial review will immediately forward you within 1 to 2 days so that you can revise it beforehand for the further peer review. The peer review is completed through a fast-tracked model in about 2 weeks up to the entire possible publication.

It should also be noted that according to the new GJESM editorial decision, all articles submitted after March 1, 2021 will apply the Article Processing Charge (APC). Therefore, to publish open access in the GJESM Journal, international

authors are eligible to pay APC: USD500.00 (for Internal authors: 1.000.000 Tomans), when it passes positively through the peer reviews. In addition, the GJESM Publisher has decided to award an annual prize to the most innovative paper of the year as USD 1000.

I wish to take this opportunity to thank you for sharing your work with GJESM Journal.

Truly yours,

Professor J. Nouri

Editor in Chief

Dear Author(s),

1- Unfortunately, we cannot observe your reviewers revisions accurately and completely at your revised file. There are some revisions on Abstract and conclusion! There are no corrections on the results and discussion.

2- As we have already said, your English writing content have not revised!

3- It is clearly written on the top of Author Query Form that all the corrections in the revised paper must be indicated with Page No / Line No)! But you have ignored!

4- As we have already noticed, each separate maps need separate cardinal direction logos as well as separate Scale logos!!

5- Finally, the Conclusion section is one of the most important element of a manuscript, so it must be more expanded scientifically and contently at least half a page length. Again you have ignored!!!

6- In addition, one notice arrived by one of the editor that your manuscript title and content must be oriented in Environmental engineering rather than civil engineering while it is not!

Thus, this is a last notice, within 2 more days again for the entire complete corrections. It is necessary to mention that the GJESM Journal is a highly peer-reviewed publication which contains an acceptance rate of 10% at the present time, thus we try our best to keep our title standard up.

In case of not receiving your revised file after the deadline, we assume that you do not like or cannot revise your last stage of article process of publication and therefore your file will be closed with no further action.

Dear Author(s),

1- Your manuscript review has now been performed as a fast-tacked peer reviewed exceptionally and virtually resulted as Major Revision where the two reviewers' comments can be found through your own dashboard in the website system (#3884). Therefore you must satisfy the both reviewers by your accurate and completed revisions.

2- You will also find an "Author Query Form" that you have to add the manuscript reviewer' inquiries and then response each item into the "Author's response" column carefully and correctly in order to be recognized by the reviewers and editor.

3- REMEMBER, any alteration and corrections must be done JUST on the attached final modified manuscript file (#3884), highlighting with RED paint in order to be recognized by the Editor and Reviewers

4- After completion of your paper revisions, please resubmit your revised manuscript as well as the completed Author Query Form file through your own dashboard back (#3884) where you had already submitted your manuscript in the system as soon as possible to avoid any further delays for the latter processing as your paper may be included at the forthcoming issue publication as the last released package.

5- Please also finalize your manuscript English content, otherwise, the manuscript processing will be delayed.

6- Should the reviewers and editor be satisfied with your amendments, you will be notified to receive the Galley Proof and related copyright forms.

7- One notice arrived by one of the editor that your manuscript theme and scope content must be oriented in Environmental engineering rather than civil engineering as it is now!

8- You will have 7 days' time to return your completed revised manuscript back. In case of not receiving your revised file after the deadline, we assume that you do not like or cannot revise your last stage of article process of publication and therefore your file will be closed with no further action.

Editorial Office

Reviewers Recommendation:

Reviewer 1:

Reviewer Comment For Author:

Soil classification is based on the composition of sand, silt and clay, then how authors classify the soils in terms of shear wave velocity profile – clarify was not observed, give more explanation on it.

How to assess the horizontal spectra and vertical spectra?

How the horizontal and vertical spectra was used to assess the soil characteristics? – Explanation is required.

Present the relationship between the geology of study area with the seismic properties towards soil classification.

How the authors assesses the shear wave velocity below the soil stratum? – Explanation is required.

What type of soil layers available in the study area?

How the faulty structure get damaged before and after earthquake? No such information, include them.

What are four types of seismic parameters consider in this study? More information is required.

Statistical analysis is to be included.

Reviewer 2:

File Sent by Reviewer:

https://www.gjesm.net/jufile?__file=R4SOS1DQz.7O_ofqr2gnr9JISS1mZdV9AReanUdL3HRng936_3fq.bU_bFG74Z6Wox4poAN3bJUTzxCXPW7gmUErdwYqov0ABfNOWII6vVah1AdIE1Op_m3UvHaVof3oh1efL9FwQDubYIjwEiXDyPgXBe7bR5BL6JwYBPzC1c.Zca5VFyw10ONe2po4vARNK

Reviewer Comment For Author:

Reviewer Reports:

I recommend a major revision at this stage.

General comments:

The manuscript entitled “Classification of soil properties based on joint analysis of shear wave velocity structure and seismic amplification” was reviewed. The work carried out in the manuscript is interesting and aimed at investigating the physical properties of the subsurface of the northernmost Sumatra. However, the authors are suggested to undergo substantial corrections before possible publication. The authors are suggested to proofread the paper with a native English speaker and restructuring of sentences is required for the entire manuscript. Better connect your research findings to previous works published in GJESM and other top journals. Please also remove any lumped references. Please define each of them separately to avoid inappropriate citations. The innovation and the importance of this work are not highlighted in the abstract, introduction, and conclusions. Please work on this and prove to us why this work is valuable. What progress against the most recent state-of-the-art similar studies was made? Additionally, the novelty of the research still is not clear and the discussion and conclusions can not satisfy me. Another main remark that in my opinion needs attention are the following:

Detailed comments:

Title: To me, the title is not well fit but it is the choice of authors. Please make it more accurate. The title doesn't reflect the core of the study.

Abstract:

The abstract does not work well. It narrates activities. A good abstract should address these issues: what are you trying to do, why, what you found and what is the significance of your findings. Should be more outcome-oriented. In the abstract, please add an indication of the achievements from your study that are relevant to the journal scope. Please be concise - maximum 1-2 lines. Data should be incorporated into the abstract.

Introduction:

It is too lengthy. The review of literature needs more updating with more recent references/works to have a clear and concise state of the art analysis. This should more clearly show the knowledge gaps identified and link them to the paper goals. The literature review should clarify the "contribution" of your study. The authors failed to present the study debates and failed to discuss the debates. In general, the authors should present the specific debate for your study. At the end of the introduction, the statement of the paper goal and the explanation of novelty has to be properly formulated. Currently, this is not performed well. Please provide one table and compare your current findings with the others.

Materials and Methods:

Ok.

Results and Discussion:

All the findings of the current work need to be compared and discussed with the results of other researchers finding instead of having a general comparison with other researchers works. The authors should perform a comparison between the forecasting results.

Conclusions:

The conclusion section appears to be just a detailed summary of results/observations and must go deeper. All conclusions must be convincing statements on what was found to be novel, impactful based on the strong support of the data/results/discussion. Limitations in the suggested approach should be discussed in the conclusions section.

References:

Please check the reference section carefully and correct the inconsistency.

Dear **Dr. Umar Muksin**

I wish to acknowledge receiving the above-mentioned manuscript. It should be noted that the manuscript will be reviewed for possible publication in the Global Journal of Environmental Science and Management (GJESM). The regular review process includes the following items:

- 1- Checking the manuscript English language
- 2- Format/ Style check based on the GJESM Paper Template
- 3- Plagiarism check (less than 15% duplicates)

4- Reaching at the blind peer reviews the manuscript at least by two potential reviewers in the field of the study, if it passes the three above-mentioned items.

Please be sure that the submitted manuscript has not been published or submitted elsewhere prior to GJESM decision.

The editor's decision will be brought to you for your attention and doing any possible further action in completing the peer review process, once the paper has been reviewed due to the reviewers' considerations.

GJESM Journal is mainly indexed in Web of Science and Scopus. The editorial initial screening of the submitted manuscript will immediately forward you within 1 to 2 days so that you can revise it beforehand for the further peer review. The peer review is completed through a fast-tracked model in about 2 weeks up to the entire possible publication.

It should also be noted that according to the new GJESM editorial decision, all articles submitted after March 1, 2021 will apply the Article Processing Charge (APC). Therefore, to publish open access in the GJESM Journal, international authors are eligible to pay APC: USD500.00 (for internal authors: 1.000.000 Tomans), when it passes positively through the peer reviews. Otherwise, you are advised immediately withdraw your submitted paper.

Finally, the GJESM Publisher has decided to award an annual prize to the most innovative paper of the year as USD 1000.

Manuscript Needs Resubmission (#GJESM-2111-3884)

1 pesan

Global Journal of Environmental Science and Management <no-reply@sinaweb.net>

11 November 2021 pukul 13.11

Kepada: muksin.umar@tdmrc.org

Cc: yusran@ar-raniry.ac.id, okubo@kochi-u.ac.jp, syamsul.rizal@unsyiah.net, m.syukri@unsyiah.ac.id, izziaputris@gmail.com, andreansimanjuntak@gmail.com, gjesm.publication@gmail.com

Dear Author(s),

1- First of all, thank you for your interest in sharing your work with GJESM Journal. However, we expected you first refer to the Journal Template at the Website Guide for authors and adjust your manuscript according to the paper template style (https://www.gjesm.net/page_119.html).

Your current version text has been editorial modified to meet the needs of GJESM to a greater extent. Therefore, you will be asked to reconsider your current version based on the comments provided. Not on your previous submission file. Remember that any changes must be highlighted in RED color to be recognized by the editor. Also, do not change the writing style provided.

2- The submitted paper is poor in terms of technical and English grammatical content, with lots of personal pronouns, while in need of revision so that it brings your article more citations for your scientific validity and future h-index benefits. You may ask an English text edition institute to correct it ultimately! After the positive peer reviews, it must be edited by an English text institute!

3- Regarding your interesting work, the manuscript review will be treated as a fast-tracked peer review model with at most 2 weeks up to entire possible acceptance.

4- You therefore have to edit your current paper within 3 days and resubmit it JUST through your dashboard (#3884) not occupying a new ID submission, so that your initial revised file can be sent to the fast-track peer reviews. After the expiration of the 3 days deadline, if the amended file is not returned on time or the correct revisions are not made completely, your file will be closed without any further action, unless you inform us in advance for a further extension.

5- The GJESM Journal is mainly indexed on the Web of Science and Scopus, trying to complete your peer reviews submitted article for a possible final publication within 2 weeks up to entire publication. Thus, your initial revised file must be immediately forwarded to us for the validating this first step of the process in the fast-track peer reviews.

6- It should be noted that all authors must contain ORCID, otherwise the possible publication will be stopped.

7- Finally, it is necessary to mention, to publish open access in the GJESM Journal, authors are eligible to pay APC: USD 500, when it passes positively through the peer reviews and acceptance.

In between, if there are any further inquiries, please do not hesitate to contact us via the journal email.

(URGENT PLEASE)!

Dear Author,

Attached through your dashboard in the website system, you will find three files; 1) Galley Proof, 2) Copyright release, 3) Conflict of interest forms.

Please read the Galley Proof carefully and correct any remaining minor corrections. As there are some further new revisions, highlight them in RED fonts to be recognized by the Editor. Then, complete and sign the two forms and return them into PDF format through your dashboard (#3884) in the system immediately for the final processes.

In addition, finalize the English language correction. The materials must be returned immediately within 2 more days for the further action

Dear **Dr. Umar Muksin**

Acceptance Letter

This is to confirm that after technical and in-house evaluation, the above mentioned manuscript is finalized and recommended by the Editorial Board Committee to be accepted for publication in the Global Journal of Environmental Science and Management (GJESM).

It is necessary to mention that GJESM is an open access, double-blind, peer reviewed quarterly publication, which is indexed and cited in the well-known world databases mainly at the [Web of Science](#), [Scopus](#), [SJR \(Q2\)](#), [EBSCO](#), [ProQuest](#), [Ulrichsweb](#), [Cabi](#), [Agricola](#) and [Chemical Abstract](#). The title is committed to the Committee on Publication Ethics (COPE) and meets the highest ethical standards in accordance with ethical rules ([COPE](#)).

It is necessary to mention, once your manuscript is published on the net, it can be accessed and read by the scientists around the world. Therefore, there will be a great chance for your article to be seen and cited by researchers around the world.

As the author of your interesting article, you are increasingly encouraged, or even mandated, to make your published research data available, accessible, discoverable and usable. Sharing research data is something we are also very interested in. Therefore, try to cite your publication in different sources specifically in the Scopus and Web of Science journal articles to increase your article citations and h-index.

In addition, please submit your article title and the related link to the social media such as Twitter, LinkedIn, Facebook,

Wikipedia, etc. to use your article visibility and quotes to update your research h-index.

Meanwhile, if you enter your own dashboard, you will find your official acceptance letter as well as the publication certificate on the submissions with a decision box for your official tracking.

Truly yours,

Professor J. Nouri

Editor in Chief

Dear **Dr. Umar Muksin**

Your article abstract is now published in the "Article in Press" for the upcoming issues of the Global Journal of Environmental Science and Management (GJESM). The PDF full-text will also be included shortly.

<https://www.gjesm.net/>

Please note that from now on, in case of your current published article gets more citations, in different sources specially in the Scopus and Web of Science journal articles as well as the social media, your future submitted manuscripts will have a better positive impact on easier acceptance in the GJESM Journal. Moreover, you and your colleagues tweet your article as much as possible on Twitter to promote your work around the world. In this regard, We hope to receive your highly cited scientific articles in the future.

Thank you for your interest in contributing with the Global Journal of Environmental Science and Management and choosing the GJESM Journal as your research hub.

Meanwhile, if you enter your own dashboard, you will find your official acceptance letter as well as the publication certificate (Decision Section) for your official tracking.

Truly yours,

Dear,
Prof. J. Nouri (Publisher and Editor in Chief)

I apologize if my answer was too simple. I just want to justify your statement which states that the Banda Aceh postal code number is 23111

And that is indeed true because the campus of Ar-Raniry State Islamic University Banda Aceh, Indonesia is a neighbor of Syiah Kuala University which is located in Kopelma Darussalam, Syiah Kuala District, Banda Aceh

City, Indonesia. Kopelma Darussalam Postal Code is 23111
Once again I apologize for not intending to be unresponsive

thank you

Best regards

Yusran Asnawi
