Subject: Manuscript Needs Major Revision (#GJESM-2209-4103 (R1))

Date: 2 October 2022 11.21

To: muksin.umar@tdmrc.org

Cc: yusran@ar.raniry.ac.id, andreansimanjuntak@gmail.com, arifullah@gmail.com, karen.lythgoe@ntu.edu.sg, marzukisinamblea@bmg.go.id, srizal@unsyiah.ac.id, shjwei@ntu.edu.sg

Dear Author(s),

1- Your manuscript review has now been performed as a fast-tacked peer reviewed exceptionally and virtually resulted as Major Revision where the three reviewers' comments can be found through your own dashboard in the website system (#4103). Therefore you must satisfy the whole reviewers by your accurate and completed revisions.

2- You will also find an "Author Query Form" that you have to add the manuscript reviewer' inquiries and then response each item into the "Author's response" column carefully and correctly in order to be recognized by the reviewers and editor.

3- REMEMBER, any alteration and corrections must be done JUST on the attached final modified manuscript file (#4103 Edited), where is on your dashboard (Not your own previous file) highlighting with RED paint in order to be recognized by the Editor and Reviewers

4- After completion of your paper revisions, please resubmit your full revised manuscript as well as the completed Author Query Form file through your own dashboard back (#4103) where you had already submitted your manuscript in the system as soon as possible to avoid any further delays for the latter processing as your paper may be included at the forthcoming issue publication as the last released package.

5- Should the reviewers and editor be satisfied with your accurate and completed amendments, you will be notified to receive the Galley Proof and related copyright forms. After acceptance of your revisions based on the 3 reviewers comments. Then we will send you the final technically edited file in order you hand your finalized paper to the English text editing institute for the final procedure.

6- You will have 5 days' time to return your completed revised manuscript back. In case of not receiving your revised file after the deadline, we assume that you do not like or cannot revise your last stage of article process of publication and therefore your file will be closed with no further action.

Editorial office

Reviewers Recommendation:

Reviewer 1:

Reviewer Comment For Author:

Reviewer Reports:

I recommend minor amendments.

General comments:

I have reviewed the manuscript entitled "Environmental vulnerability characteristics in active swarm region". The work carried out is interesting and aimed at investigating vulnerability after swarm phenomena in specific clusters in Toba. However, I have

gone through the paper; The structure of the paper and the method of reviewing to address the problem statement is clear and details. In my opinion, it needs a few changes before proceeding for publication, and I have tried to address them. I hope my comments help to improve the quality of the paper. Please eliminate the lump of references. After that please check the manuscript thoroughly and eliminate all the lumps in the manuscript. This should be done by characterizing each reference individually. This can be done by mentioning 1 or 2 phrases per reference to show how it is different from the others and why it deserves mentioning. Please eliminate the use of redundant words. Eg. In this way, Recently, Respectively, therefore, currently, thus, hence, finally, to do this, first, in order, however, moreover, nowadays, today, consequently, in addition, additionally, furthermore. Please revise all similar cases, as removing these term(s) would not significantly affect the meaning of the sentence. This will keep the manuscript as concise as possible. Please check all. Avoid beginning or ending a sentence with one or a few words, they are usually redundant. Kindly revise all. It is recommended that the authors work with a science editor who is proficient in the Native English language to improve the organization and delivery of some portions of the manuscript. This will help improve the readability and help articulate better the relevance of the authors' work. The journal's author guidelines and instructions should be followed in preparing the revised version.

A few more details comments as follow:

Title: Ok.

Abstract:

In the abstract, please add an indication of the achievements from your study that are relevant to the journal scope. Please be concise - maximum 1-2 lines.

Introduction:

Introduction. You need to connect the state of the art to your paper goals. Please follow the literature review with a clear and concise state-of-the-art analysis. This should clearly show the knowledge gaps identified and link them to your paper goals. You also need to explain the results, research novelty, the significance of the study, and the structure of the paper.

Results and Discussion:

In your discussion section, please link your empirical results with a broader and deeper literature review.

Conclusions:

Please make sure your conclusions section underscores the scientific value-added of your paper, and/or the applicability of your findings/results. Highlight the novelty of your study.

References:

The bibliography style is not always consistent, please check the reference section carefully and correct the inconsistency.

Reviewer 2:

Reviewer Comment For Author:

- The abstract was too long – reduce the content in each sub heading
- The results section in the abstract should have finding results of this study
- What about the statistical analysis details?
- Is there any similar such event occurred in any part of the world?, if it is so, compare with those details.
- The conclusion chapter is also too long, reduce the content, and some relevant content may be shifted to materials and methods chapter.
- How the authors classified the subsurface condition of the geological area of the study?
- The authors did not discuss about the type of vulnerability in this study?
- The scale ranges of the vulnerability due to earthquake was not discussed – include it.
- What is maximum scale for which, the study area affected?
- What type of mitigation measures suggested by the authors based on the results findings from this study?
- The properties of geological area of this study should be included.

Manuscript Title: **Environmental vulnerability characteristics in active swarm region**

Authors: Umar Muksin, Andrean V H Simanjuntak, Yusran Asnawi, Arifullah Arifullah, Karen Lythgoe, Marzuki Sinambela, Syamsul Rizal, Shengji Wei

Dear Dr. Umar Muksin

Acceptance Letter

This is to confirm that after technical and in-house evaluation, the above mentioned manuscript is finalized and recommended by the Editorial Board Committee to be accepted for publication in the Global Journal of Environmental Science and Management (GJESM).

It is necessary to mention that GJESM is an open access, double-blind, peer reviewed quarterly publication, which is indexed and cited in the well-known world databases mainly at the [Web of Science](#), [Scopus](#), [SJR \(Q1\)](#), [EBSCO](#), [ProQuest](#), [Ulrichsweb](#), [Cabi](#), [Agricola](#) and [Chemical Abstract](#). The title is committed to the Committee on Publication Ethics (COPE) and meets the highest ethical standards in accordance with ethical rules ([COPE](#)).

It is necessary to mention, once your manuscript is published on the net, it can be accessed and read by the scientists around the world. Therefore, there will be a great chance for your article to be seen and cited by researchers worldwide.

As the author of your interesting article, you are increasingly encouraged to make your published research data available, accessible, discoverable and usable worldwide. Sharing your research data is something we are also very interested in. Therefore, try to cite your publication in different sources specifically in the Scopus and Web of Science journal articles to increase your article citations and h-index.

It is also so important to announce that the Global Journal of Environmental Science and Management (GJESM) will receive a Journal Impact Factor (**JIF**) in the early 2023 release of the Journal Citation Reports (**JCR**) Web of Science Core Collection™

In addition, please submit your article title and the related link to the social media such as Twitter, LinkedIn, Facebook, Wikipedia, etc. to use your article visibility and quotes to update your research h-index.

Meanwhile, if you enter your own dashboard, you will find your official acceptance letter as well as the publication certificate on the submissions with a decision box for your official tracking.

Truly yours,

Professor J. Nouri

Editor in Chief

Dear Author(s),

We think you do not care to read completely our comments and returned your file incompleated as below!:

1-All English corrections throughout the text should be highlighted in red fonts to be recognized by the editor!!! English proofreading performance by Proofreading Company is not highlighted! Remember that proofreading should be done by the company where it was edited, not you!

2- We told you the 2 copyrights after signing must be returned into PDF format (However, we did into PDF on your behalf)

After **one more day** you must return back the English corrections Galley Proof file (4103 Edited) file. Otherwise, your file cannot be processed for the last approval.

Dear Author,

As you see from your semi-final technical revised file as attached (4103 Galley Proof-2), there are some additional required corrections are needed for (**Figs 2, 3, 4, 5 and 6**) which are indicated throughout the text. Thus, you must revise them accurately along with the English corrections! All the figures corrections must be done on the attached file (4103 Galley Proof-2).

In addition, as we have already noticed, you must ask the **Enago** proofreading Proofreading Services that all new edited English corrections must be highlighted with RED fonts to be recognized by the Editor. We hope we receive your well-done revisions as the forthcoming issue is going to release. Also, your manuscript file size was 7.3 MB which was too large for the publication process, so it is now reduced to 1MB. So, keep the attached file for your further action.

In addition, we have already asked you (Professor Muksin) about the Enago agency with no response by you!

Dear editorial team,

As you requested, we just submitted our manuscript to Enago for proofreading again.

Please give time for Enago to finish the proofreading in at least 3 days.

Once we get the revised version from Enago, we will resubmit the manuscript.

Thank you very much and best regards,

Muksin

FINAL NOTICE:

Dear Author(s),

We think you do not understand what we noticed you. In this regard we normally reject such behaviour and action by authors, but because of your records as our previous authors we will give you a single final chance! According to the recent Journal regulations all non-English native authors Galley Proof which all technical revisions are done not before the technical revisions, it must be handed to a certified English Agency to edit the Galley Proof along with highlighting the sentences which are edited in English format to be recognized by the Editor.

Also, an uptodate formal certificate must be issued and forwarded along the edited file throught the system (The English Agency email and website must be written in the certificate for confirmation).

In addition. it is the responsibility of the editor in chief and Journal English text editor of the Journal to determine the approved and corrected English, not the authors!). Therefore your final version needs professional English corrections! (Perhaps you may find a right certified English proofreading for your paper).

Therefore, next time, if you do not perform our recommendation pretty well anymore, your file will be closed with no further action, especially your 2 previous published articles had no interested (cited) by other scientis around the world!).

Subject: Request for Submit/Confirm Galley Proof (#GJESM-2209-4103 (R1))
Date: 7 October 2022 19.06
To: muksin.umar@tdmrc.org
Cc: yusran@ar.raniry.ac.id, andreansimanjuntak@gmail.com, arifullah@gmail.com, karen.lythgoe@ntu.edu.sg, marzukisinamblea@bmg.go.id, srizal@unsyiah.ac.id, shjwei@ntu.edu.sg

Dear Author(s),

At this period, you should take the following 2 steps:

1- Attached in your dashboard in the website system, you will find three files; 1) Galley Proof, 2) Copyright release, 3) Conflict of interest forms.

Please read and finalize the Galley proof content as remaining some additional technical corrections. Then, complete and sign the two copyright forms and return them into PDF format through your dashboard (#4103) in the system immediately for the final processes. This step must be done after performing the step 2.

2- After finalizing your technical content, your prepared technical file needs to be corrected and finalize its English grammatical content, thus it should be finalized by the English text editing institute providing the certificate to bring more citations to your article for your scientific validity and future h-index benefits. Remember ask the English editor to highlight the English corrections with red fonts JUST on the send Galley Proof to be recognized and approved by the Editor.

3- We are also surprised that you this is your third publications with no citations at the indexed databases publications throughout the world!!! It is necessary to mention just publishing an article with no citations are not good for you and your group. That means no one is interested to use your data as they are not interested by them!!!

Remember, if co-authors are not available to sign the forms, the corresponding author can sign in her/his own row, on their co-authors behalf if the co-authors have authorized the copyright.

You will have 5 days' time to return your completed revised manuscript back. In case of not receiving your revised file after the deadline, we assume that you do not like or cannot revise your last stage of article process of publication and therefore your file will be closed with no further action.

Dear Author(s)

Global Journal of Environmental Science and Management is proud to have implemented a podcast on your published article. so that you can listen to your published article in digital audio format over the Internet. This facility is running from Volume 9 Issue 2; Spring 2023, where your article is published on. You can observe it on the first page of your PDF published article as well as on the website "View Article" on the right hand side sign in mp3.

We hope you are satisfied with your published article in this valuable publication.
With the best wishes.
