Reviewer Recommendation Term:	Minor revisions
Transfer Authorization	Response
If this submission is transferred to another publication, do we have your consent to include your identifying information?	Yes
If this submission is transferred to another publication, do we have your consent to include your original review?	Yes
Custom Review Question(s):	Response
Publons Reviewer Recognition. Springer Nature can send verification of this review directly to Publons (a subsidiary of Clarivate Analytics). If you would like to take advantage of this service, please click on the "Yes" option below. Your name, email address, title of the reviewed manuscript, name of the journal, and date of your review submission (the "Review Data") will then be transmitted to Publons after the final decision on the manuscript has been made. If you have already registered at Publons, they will notify you of the receipt of this review and update your profile as per your settings and their policy. If you are not registered with Publons, you will receive an email from them asking you to register in order for them to be able to recognize your review on your new profile page. Publons may use the Review Data to generate derivative metadata for the benefit of Publons and you as a reviewer, carefully considering the sensitivity of such information. For example, Publons may verify your record as a reviewer by updating your profile published on its webservice if you have registered for such service or help editors to identify candidate reviewers. Please find the details of processing in Publons' privacy policy https://publons.com/about/terms	Yes
Level of interest Please indicate how interesting you found the manuscript:	An article of importance in its field
Quality of written English Please indicate the quality of language in the manuscript:	Acceptable
Declaration of competing interests Please complete a declaration of competing interests, considering the following questions: 1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future? 2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?	I declare that I have no competing interests

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?
4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?
5. Do you have any other financial competing interests?
6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

Comments to Editor:

Using the thought of developed countries, the topic may not be interesting as mobile banking issue is not a new tool in banking transaction. However, thinking of the developing countries that are still struggling in providing the internet service for their people, this research may be something special. With few revisions, I suggest this article be accepted.

Comments to Author:

Author needs to clarify the following comments:

1. The sentence in the abstract "The numbers of 453 questionnaires were collected.." were not clear on the term of how many questionnaire were distributed
2. The novelty is not clearly stated
3. Before presenting the aim to develop the model, author should provide reasons on why this topic is important, especially for the case of Sudan.
4. At the end of the sub title "Related work" after par. 3, author should provide a robust reason why combining ECM and UTAUT2 models are important
5. Author should consider updating the data since the issue within this topic is rapidly changing

Investigating the Antecedents of Continuance Intention to Use Mobile Payments in Sudan
Financial Innovation

Abstract: The technological improvement in the area of telecommunication and the growing use of smartphones around the world has facilitated the purchase and payment transaction via mobile phone. This new method of payment provides flexibility and convenience to people in sitting out their daily activities. The current study aimed to explore the continuance use of mobile payment antecedents in Sudan. The numbers of 453 questionnaires were collected to test the proposed theoretical model using SEM. The results explored that, satisfaction was the most significance factor of mobile payment continuance intention usage. Interestingly, hedonic motivation and price value were found negatively influence intention use of mobile payment in Sudan
