*Dear Authors:*

After we checked, we found that you have not yet completely revised your article entitled "**ANALYZING ACEH CULTURAL HERITAGE: MATHEMATICAL TOOLS AND LANGUAGE USE**" base on the suggestions of the reviewers. Please re-check the note from the reviewer that was sent to you.

1. Please pay attention to suggestions and comments from reviewers (see notes in the file submitted by reviewers);
2. In the introduction, you do not need to make subtitles for theory, because this will make your paper long and not focus on the study. However, you can discuss it directly by linking it to the problem in the introduction so that your discussion is more focused. It is true, the literature review should be conducted by investigating the definition of terms, existing related work, and the available space as a gap to contribute towards problem-solving. By carefully reviewing this, it will help to look at the particular contribution to the existing literature. If you keep doing that, then you should separate the introduction from the literature review so that it becomes a separate sub after the introduction. Besides that, you should be able to make sure that the theory you include in the introduction is different from that in the literature review, and this section is actually a previous study;
3. Make sure all references use the Mendeley application;
4. For every journal article you cite, try to include the DOI of the article.

After your paper revised, please upload again your paper in the Revisions section. Please make sure the revision that you submitted has been in this journal template and has followed the [authors' guidelines of JIP](#).  
Thank You
