Dear Mr. Azhari

Your above-referenced manuscript, entitled "Distance Learning During Covid-19 Pandemic: A Case of Indonesia School Closure", has been unsubmitted to International Journal of Mathematical Education in Science and Technology.

It has been returned to you because you did not complete all necessary parts of the submission. Authors should prepare and upload two versions of their manuscript. One version should be a complete text containing all author(s) information, while in the second version all information identifying the author(s) – name, affiliation, contact details and acknowledgements - should be removed from files to allow them to be sent anonymously to referees.

When uploading their files, authors will be able to save their non-anonymous version under the File Designation 'Title page' and the anonymous version under the File Designation 'Main Document - anonymous'.

Please visit the instructions to authors to complete your submission and re-submit the manuscript for consideration for publication. You may contact the Editorial Office if you have further questions.

With best wishes,

Kavitha

Dear Mr. Azhari

Your manuscript entitled "Distance Learning During Covid-19 Pandemic: A Case of Indonesia School Closure", which you submitted to International Journal of Mathematical Education in Science and Technology, has been reviewed. The reviewer comments are included at the bottom of this letter.

The reviews are in general favourable and suggest that, subject to major revisions, your paper could be suitable for publication. Please consider these suggestions, and I look forward to receiving your revision.

When you revise your manuscript, please highlight the changes you make in the manuscript by using the track changes mode in MS Word or by using coloured text.

To start the revision, please click on the link below:

*** PLEASE NOTE: This is a two-step process. After clicking on the link, you will be directed to a webpage to confirm.***

This will direct you to the first page of your submission form. Please enter your responses to the comments made by the reviewer(s) in the space provided. You can use this space to document any changes you made to the original manuscript. Please be as specific as possible in your responses to the reviewer(s).

This link will remain active until you have submitted your revised manuscript. If you begin a revision and intend to finish it at a later time, please note that your draft will appear in the "Revised Manuscripts in Draft" queue in your Author Centre.

IMPORTANT: Your original files are available to you when you upload your revised manuscript. Please delete any redundant files before completing the submission.

Because we are trying to facilitate timely publication of manuscripts submitted to International Journal of Mathematical Education in Science and Technology, your revised manuscript should be uploaded within one year, i.e., by 21-Aug-2021. If it is not possible for you to submit your revision by this date, we may have to consider your paper as a new submission.

Once again, thank you for submitting your manuscript to International Journal of Mathematical Education in Science and Technology, and I look forward to receiving your revision.

Comments to the Author

The contextual case of this article is interesting and relevant with current situation. However the population/sample size is too small to generate in country context. It is not Indonesia case, but merely local of Aceh? or particular case in

Indonesia. The author is required to change the article title or provide more specific sub title within the current title to avoid confusing of people in reading their article.

Reviewer: 2

Comments to the Author

1. Abstract is too short, describing to Methods and Results is expected.
2. Need to the determine if on March 11th 2020 is "the beginning of Covid-19 pandemic statue in Indonesia.
3. The last sentence on Introduction is not relevant to the title.
4. On Introduction, only describing about Covid-19, describing about Distance Learning is expected.
5. On Methodology, term "This study used a mixed-method approach by investigating the research trend, involving multiple data sources, as well as building the findings' reliability and validity" become irrelevant to the title.
6. "The population and sample were 2,972 Junior and Senior High School teachers from 23 districts in Aceh, Indonesia" is inconsistent.
7. "Interview subjects were selected based on the criteria from the results of the questionnaire: the high, medium and low categories, each with three people from each level of schooling and based on the consideration of the place of residence" is a ambiguous.
8. "The qualitative data were analyzed descriptively using SPSS version 22 for Windows".....should be this is "The quantitative data".
9. Content of Table 3, must be included "Participants".
10. Decimals is inconsistent.
11. From Table 4, must be added to conclusion about "Teachers' Understanding of Distance Learning".
12. Results, must be discussing study from Questionnaire.

Comments to the Author

In general, this article has an excellent scientific element that will have a reference impact for future researchers who will research learning in the Covid-19 Pandemic era. however, several things need to be clarified by the author, namely:

1. In the Method section (Page 2, Line 46), A sample of 353 people was obtained based on the Slovin formula. However, the determination of the six teachers was not explained in comprehensive. Why should 6? Does the argumentation from the six people have the same perception with 353 people if the whole sample is interviewed? Besides, do these six people represent the population group (junior high school and senior high school)? Please explain the reasons for taking the six people.
2. It would be better if the interview instrument were also presented in the method section so that readers understand the flow of the author's thinking in the interview process.
3. In the Results and Discussion section (page 4, line 23), The sample consisted of 198 males and 155 females. What is the meaning and impact of this statement? Was the research analyzed the research results based on gender? Besides, will it be studied based on the level of education (graduate & undergraduate)? If it is not studied that far, then what is the rationalization of the usefulness of the statement?
4. In the Results and Discussion section (page 4-5), It would be better if tables 4, 5, and 6 were also made with a diagram visualization display so that readers can understand based on the statements on each indicator.
5. In the Results and Discussion section (page 6), The appearance of Figure 2 blocks the explanation sentence in Figure 2.

TMES-2020-0208 - Distance Learning During Covid-19 Pandemic: A Case of Indonesia School Closure

Dear Mrs. Kavitha Kannadasan

According to your replay regarding "International Journal of Mathematical Education in Science and Technology - TMES-2020-0208.R1 has been unsubmitted", we were asked to re-submit our manuscript by adding title, authors' names, affiliations, address of affiliations and email address for the corresponding author.

Actually in the portal <https://mc.manuscriptcentral.com/> we have added title, authors' names, affiliations, address of affiliations and email address for the corresponding author in Step-2 (Type, Title, & Abstract) and Step-5 (Authors & Institutions). Yet in Step-3, the manuscript and title page doc we have not added those, because We thought the revised manuscript that we uploaded into Step-3 will be sent to reviewers for reviewing further.

Hereby, we want to confirm to editor, what the information you mean into the revised manuscript in Step-3 or in portal (Into Step-2 and Step-5)? Meanwhile we already added those needed information as attached in pdf document below.

We will wait the further suggestion form editor (s).

With best wishes,

Dear Mr. Azhari

Your above-referenced manuscript, entitled "Distance Learning During Covid-19 Pandemic: A Case of School Closure in Aceh Province, Indonesia", has been unsubmitted to International Journal of Mathematical Education in Science and Technology for following reasons.

1. Author details are revealed in the response to reviewers as well as in the anonymous manuscript document. Details of authors including Authors name, university, email id, contributions or any acknowledgements should not be added on the anonymous manuscript document as well as in the response to reviewer. These should be included in the Title page (not for review) file. This journal uses a double-blind peer review process so we need an entirely anonymous manuscript file.
2. The conflict of interest statement is missing in your manuscript, include a conflict of interest statement within your manuscript document.

Kindly do the above mentioned changes so that we could proceed further.

Please visit the instructions to authors to complete your submission and re-submit the manuscript for consideration for publication. You may contact the Editorial Office if you have further questions.

Dear Raja Chinnadurai,

Thank you to the Production Editor team for helping us improve the quality of our article. We would like to inform you that there was a mistake we had when writing the affiliation. In this regard, on behalf of Budi Azhari, we need to correct "Departement of Mathematics Education, Universitas Islam Negeri Ar-Raniry, Kopelma, Indonesia". It should be written with the Affiliation "Departement of Mathematics Education, Universitas Islam Negeri Ar-Raniry Banda Aceh, Indonesia". Furthermore, the author on behalf of Iwan Fajri with the affiliation "Departement of Technology Information Education, Universitas Islam Negeri Ar-Raniry, Banda Aceh, Indonesia" should be written with the affiliation "Department of Information Technology Education, Universitas Islam Negeri Ar-Raniry Banda Aceh, Indonesia"

We are very grateful for your help. If you have any questions, please let us know. We will be glad to improve the quality of this article.

Best Regard,

Budi Azhari
